SADDLEBACK COLLEGE CURRICULUM COMMITTEE

College Mission: Saddleback College empowers its diverse student body to achieve personal, academic, and economic advancement through equitable and innovative educational experiences.

Tuesday, October 22, 2024

The meeting starts promptly at **3:00PM in AGB 106**

1. **Approval of Minutes – October 8, 2024, p. 6-10**
 - **First: Carmenmara Hernandez-Bravo**
 - **Second: Annie Gilbert**
 - **Motion passed**
2. **Approval of Agenda**
 - **First: Carmenmara Hernandez-Bravo**
 - **Second: Linda Call**
 - **Motion passed**
3. **Public Comments – Anyone may address the Curriculum Committee on any item NOT on the Agenda within the subject matter and jurisdiction of the Senate pursuant to Section 53200 of Title 5 California Code of Regulations. Each speaker is limited to two minutes.**
 - **There were no public comments.**
4. **Chair's Report**
 - **The convenings for the Phase II Common Course Numbering disciplines have been scheduled:**
 - **October 28, 29, and 30: History, English, Economics, Art History**
 - **November 18, 19, 20, and 21: Biology, Chemistry, Math, Astronomy**
 - **The surveys for Anthropology, Communication Studies, Sociology, and Child Development are closing on November 3rd; convenings for these disciplines are scheduled for December 2, 3, and 4**
 - **There are a very limited number of spaces for faculty statewide to participate; nominations needed to be submitted to Academic Senate.**
 - **Karla Westphal noted that the requirement for the convenings was for representatives to be present at all meetings, but faculty have teaching requirements and frequently can't meet on that many consecutive days in a single week.**
 - **Aimee Tran explained that this concern has been shared, however, the expectation that faculty representatives commit to attending all convening meetings for their respective discipline remains unchanged given the circumstances and timeline.**
5. **Curriculum Committee Training – Information Item**
 - **There was no training.**
6. **Proposed New General Education Certificate of Achievement (Cal-GETC) for Academic Year 2025-26 – Information Item, p. 11-22**
 - **Effective Fall 2025 there will be a single transferable GE pattern (Cal-GETC) replacing the current CSU GE and IGETC patterns. Courses that are currently approved for the IGETC pattern will retain GE approval in the Cal-GETC pattern.**
7. **Proposed New Credit Course (CIMA 630/130) for Academic Year 2025-26 – Information Item, p. 23**
 - **This new course was created based upon a recommendation by the advisory committee to develop artificial intelligence coursework. It will be included in the Business Data Analytics and Database A.S. degree.**
8. **Proposed New Noncredit Courses (HSC and MA) for Academic Year 2025-26 – Information Item, p. 24-25**
 - **Eight new noncredit courses were provided for information; these courses will be included in three new noncredit medical assisting programs (agenda item 9).**
 - **Credit versions of these courses exist.**

**SADDLEBACK COLLEGE
CURRICULUM COMMITTEE**

9. **Proposed New Noncredit Programs for Academic Year 2025-26 – Information Item, p. 26-28**
 - A. Administrative Medical Assistant Certificate of Completion
 - B. Clinical Medical Assistant Certificate of Completion
 - C. Comprehensive Medical Assistant Certificate of Completion
 - **Three new noncredit medical assistant certificates were provided for information; these programs were developed at the recommendation of the advisory committee.**

 - A. Prerequisite changes
 - a. HSC 108 – prereq from ~~HSC 104, HSC 107 or BIO 113~~ to HSC 104 or BIO 13
 - **The prerequisite is being modified to reflect the deletion of HSC 107 and the course number change for BIO 113 due to UCTCA approval effective Fall 2025.**
 - b. PHYS 4C – prereq ~~PHYS 4A or MATH 3B~~ to PHYS 4A
 - **The department is removing MATH 3B as a prerequisite.**
 - B. Remaining course changes
 - **These include additional changes to the Travel Management work experience course, HSC 108, HSC 230, and PHYS 4C.**

11. **Proposed New Taxonomic Pathway for Surgical Technology for Academic Year 2025-26 (Spring) – Information Only Item, p. 31**
 - **A new taxonomic pathway is necessitated for the new surgical technology coursework and degree being developed for Spring 2026 (agenda items 14 and 15).**

12. **Proposed Course Revisions Per AB1111 (Common Course Numbering Phase I Courses – COMM 1/1H, ENG 1A/1AH, ENG 1B/1BH, PS 1/1H, MATH 10/10H, PSYC 1/1H) for Academic Year 2025-26 – Information and Action Item, p. 32-34**
 - **The 12 courses in this item are part of Phase I for the statewide Common Course Numbering initiative legislated by AB1111; changes being made to these courses include those specified in CCN templates to reflect the required taxonomy and identical language for course prefix/number, prerequisites, course description, course objectives/outcomes, course content, methods of evaluation, and representative texts. Additional changes include those made to assignments and the DE addenda.**
 - A. Prerequisite changes
 - **First: Carmenmara Hernandez-Bravo**
 - **Second: Tom DeDonno**
 - **Motion passed**
 - a. ENG 1A (ENGL C1000) – prereq from ~~Placement by the current assessment process~~ to Placement as determined by the college’s multiple measures assessment process

COMPLIANCE WITH BROWN ACT

The Curriculum Committee is a subcommittee of the Academic Senate and therefore must comply with the Brown Act. Section 54954.2(a) of the Ralph M. Brown Act states that "*No action or discussion shall be undertaken on any item not appearing on the posted agenda*, except that members of a legislative body or its staff may briefly respond to statements made or questions posted by persons exercising their public testimony rights under Section 54954.3. In addition, on their own initiative or in response to questions posted by the public, a member of a legislative body or its staff may ask a question for clarification....

1. Anticipated first term of offering: Fall Spring Year 2026

2. Catalog Description:

Course introduces the development of artificial intelligence (AI) applications including chatbots, virtual agents, web sites, and business application development. The course will also include prompt engineering for the optimal benefit of the applications. More specifically, students will use different Foundation Models to build applications in a variety of environments.

3. Is this course being aligned to a C-ID descriptor? Yes No N/A

C-ID Code: [Click here to enter text.](#)

If yes, see the Articulation Officer for assistance with C-ID descriptors.

4. A. Will course be cross-listed? Yes No

If yes, which department is responsible for scheduling, updating, and assessing the course?

Reason for cross-listing: [Click here to enter text.](#)

B. If you are mirroring a Non-Credit course with a Credit course- please list Credit course here:

5. Justification of recommendation for new course: How was the need for this course identified? How will this course meet student needs in ways that currently approved courses (including those from other departments) do not?

Artificial Intelligence is changing many aspects of our daily lives and students will be part of this environment. This course is needed to help students learn different tools that can be used for developing AI applications. This will be the second AI course at Saddleback and students have been requesting more AI in the classroom. Advisory committees have recommended we include more AI in the classroom.

6. Course Requisites:

Pass/No Pass only

Pass/Satisfactory Progress/No Pass (P/SP/NP)

9. Will course be Repeatable? No Yes

Additional skills that will be acquired by repeating this course must be included in the course outline.

If yes, how many times? 1 2 3 Unlimited (Non-credit only)

Reason for Repeating:*

Intercollegiate Athletics

Intercollegiate Competition

- Occupational Work Experience/General Work Experience
- Additional enrollment required by Transfer Institution (CSU & UC only) to meet lower division requirements for a baccalaureate degree.

1. Anticipated first term of offering: Fall Spring Year 2026

2. Catalog Description:
 Combining data, computation, and inferential thinking, data science is redefining how people and organizations solve challenging problems and understand their world. In this class, we explore key areas of data science including question formulation, data collection and cleaning, visualization, statistical inference, predictive modeling, and decision making. Through a strong emphasis on data centric computing, quantitative critical thinking, and exploratory data analysis, this class covers key principles and techniques of data science. These include languages for transforming, querying and analyzing data; algorithms for machine learning methods including regression, classification and clustering; principles behind creating informative data visualizations; statistical concepts of measurement error and prediction; and techniques for scalable data processing.

5. Justification of recommendation for new course: How was the need for this course identified? How will this course meet student needs in ways that currently approved courses (including those from other departments) do not?

This course is needed because Machine Learning is a fundamental process used in creating generative AI models. As Artificial Intelligence (AI) becomes part of every business, students that understand how to create machine learning models will be in demand. This course will be the start for teaching students. This is the next step for students after the fundamentals of data science course (CIM 8) to developing AI models.

Contact information for Program Initiator: Jeffrey Bryan jbryan@saddleback.edu 435-237-2935 e. Proposed Pathway for new program: Arts, Media, & Design f. Summary description of the new program: The Games and Interactive Media program prepares students for entry-level careers as artists in the game design and interactive media entertainment industries, for both analog and digital environments, such as character artists, environment artists, prop designers, level designers, animators, or 2D and 3D artists. The program also provides coursework for professionals interested in upgrading skills and/or receiving certification in the field. The certificate program has two tracks, one focusing on design and one focusing on art. Along with providing certification for professionals in the field, these certifications are also meant to provide students from other degrees relevant to the industry, like Studio Arts, Illustration/Animation, Film, Television, and Electronic Media, Computer Science, etc. with a games and interactive media specialization for their coursework, increasing their job market competitiveness. g. Brief Description of how the idea for the new program came about: We developed our games and interactive media program to expand and strengthen our broader graphic design program to meet the needs of the gaming and interactive media entertainment and tech industry sectors. We expanded our initial research via industry outreach and educational outreach and developed an advisory board to guide us as we develop the course structures for the certificates and degree. From this research, we have found a need to develop a program that includes inter-departmental collaboration to meet the needs of our students, the industry, and 4-year colleges. h. 2	<p>g. Brief Description of how the idea for the new program came about: We developed our games and interactive media program to expand and strengthen our broader graphic design program to meet the needs of the gaming and interactive media entertainment and tech industry sectors. We expanded our initial research via industry outreach and educational outreach and developed an advisory board to guide us as we develop the course structures for the certificates and degree. From this research, we have found a need to develop a program that includes inter-departmental collaboration to meet the needs of our students, the industry, and 4-year colleges.</p> <p>h. Please list all courses to be included in the program and total units: *Indicates new courses *35-36 total units depending on pathway chosen; see attached</p>

5. Justification of recommendation for new course: How was the need for this course identified? How will this course meet student needs in ways that currently approved courses (including those from other departments) do not?

This course is meant to provide students with a strong foundation in the basic arts practices of the entertainment arts, arts that are pointedly character-driven. We conducted surveys and interviews with stakeholders, including 4 year institutions and industry professionals, who identified the need for our students to have strong training with particular specializations. As the focus of our program is developing art students for the games and interactive entertainment sectors, there is a need to have several specialized courses addressing the needs of that sector. There are currently no courses that focus on this fundamental concept at Saddleback. This course will also prove valuable for the animation degree program.

1. Anticipated first term of offering: Fall Spring Year 2026

2. Catalog Description:

Introduces the tools and practices of 3D computer graphics with a focus on character creation and animation. This course explores the basic principles of animation while designing along the production pipeline used primarily in CGI, games, and simulations. Students develop proficiency in 3D modeling and character design via lectures and assignments focused on the use of a 3D modeling for designing a character. Students produce digital animations that demonstrate such proficiencies, principles, workflow, and techniques.

3. Is this course being aligned to a C-ID descriptor? Yes No N/A

5. Justification of recommendation for new course: How was the need for this course identified? How will this course meet student needs in ways that currently approved courses (including those from other departments) do not?

This course is meant to provide students with a strong foundation in the basic arts practices of the entertainment arts, arts that are pointedly character-driven and heavily 3D CGI focused. We conducted surveys and interviews with stakeholders, including 4 year institutions and industry professionals, who identified the need for our students to have strong training with particular specializations. As the focus of our program is developing art students for the games and interactive entertainment sectors, there is a need to have several specialized courses addressing the needs of that sector. There are currently no courses that focus on this fundamental concept at Saddleback. This course will also prove valuable for the animation degree program.

1. Anticipated first term of offering: Fall Spring Year 2026

2. Catalog Description:

Introduces the process of world-building and interaction design from the standpoint of the art director. The course will explore using a game engine and associated scripting to maneuver characters around in 2D/3D space, develop interactive game environments, implement special effects, manipulate objects, script menus and graphical user interfaces, create non-player character behaviors, and much more. Builds skills in setting experiential goals and in defining and building mechanical and dynamic elements to support those goals. Includes exploration of the development of expansive virtual worlds incorporating objects, scenes, and narrative structures.

1. Anticipated first term of offering: Fall Spring Year 2026

2. Catalog Description:

This is a culminating course meant to be taken at the completion of all other coursework for the degree. Students work in teams to design and implement a unique game or interactive experience. Emphasis on art and level design, as well as game aesthetics and world building. Particular attention should be paid to the development of character both as an art object and as a narrative element. Each project presents opportunities to address milestones in the art production development pipeline, and demonstrates corresponding entry-level technical and conceptual skills and strategies. Students will also be expected to address and practice the various team-based soft skills required in the industry. Students are expected to carry additional workload requirements outside of class.

3. Is this course being aligned to a C-ID descriptor? Yes No N/A

C-ID Code:

If yes, see the Articulation Officer for assistance with C-ID descriptors.

4. A. Will course be cross-listed? Yes No

If yes, which department is responsible for scheduling, updating, and assessing the course?

B. If you are mirroring a Non-Credit course with a Credit course- please list Credit course here:

5. Justification of recommendation for new course: How was the need for this course identified? How will this course meet student needs in ways that currently approved courses (including those from other departments) do not?

This course is meant to provide students with an opportunity to develop portfolio work for competitive entry into the industry. We conducted surveys and interviews with stakeholders, including 4 year institutions and industry professionals, who identified the need for our students to have opportunities to develop games in teams for portfolio development. There are currently no courses that cover this need at Saddleback. There is also no course that satisfies the collaborative group creation needed for *real* game design.

6. Course Requisites:

List all requisites*:

Prerequisite:

Co-requisite:

Limitation on enrollment: Students must complete all other degree requirements before enrolling

Recommended Prep:.

**Please attach justification for the recommended requisites. Refer to the [Chancellor's Guidelines for Title 5 §55003](#)*

7. Will this be a standalone course?

Yes Course will **NOT** be included in a degree or certificate program.

No Course **WILL** be included in a degree and/or certificate program.

Which ones:

Games and Interactive Media AS

**Paperwork for the program (new or revised) must be submitted at the same time as the new course is being developed*

8. Proposed Grading System:

Letter Grade Only

Option of a standard letter grade or Pass/No Pass

Pass/No Pass only

**New
Cal-GETC
Certificate of Achievement**

The California General Education Transfer Curriculum (Cal-GETC) is an interdisciplinary program that allows students to acquire and integrate knowledge in the areas of English Communication (composition, critical thinking and oral), quantitative reasoning, scientific inquiry, arts, humanities, social sciences, and ethnic studies.

Students may earn a Certificate of Achievement upon completion of the California General Education Transfer Curriculum (Cal-GETC) with a minimum of 34 units. Courses must be completed with a “C” grade or better or “Pass”. The Cal-GETC should be completed by students who intend to transfer to the University of California (UC), California State University (CSU) and may also be accepted at some private/independent or out of state universities. See www.assist.org for more information.

Program Student Learning Outcomes
Students who complete this program will be able to:

- Demonstrate effective English Communication through writing, critical thinking and oral communication.
- Develop, present, use, and critique quantitative arguments.
- Understand the nature and richness of human culture and social structures through a comparative approach.
- Recognize the contributions to knowledge, civilization, and society that have been made by men, women, and members of various ethnic or cultural groups.

**Administrative Medical Assistant
Certificate of Completion**

The Administrative Medical Assistant Certificate of Completion program is designed to prepare the incumbent worker with additional administrative skills for work and career growth as an administrative (front office) medical assistant working in a medical office, clinic or outpatient center. This certificate program is designed to help meet industry demand, offering education and training on soft skills, appointment scheduling, reception duties, managing patient medical records, insurance authorizations, reimbursement and coding for the medical office or clinic. Students are required to complete and pass all assignments mirroring the medical assistant for credit courses. Students do not earn a letter grade.

Program completion qualifies students to sit for the American Academy of Professional Coders (AAPC) and Certified Practice Coder (CPC) certification exams, but does not qualify students to sit for the California Certifying Board for Medical Assistants (CCBMA) certification.

Program Student Learning Outcomes
Students who complete this program will be able to:

- Demonstrate administrative medical skills
- Describe legal and ethical practices related to medical care
- Demonstrate medical office employability skills

Required Core:

<u>HSC 404NC</u>	<u>Medical Terminology</u>	<u>49.8</u>
<u>MA 406NC</u>	<u>Introduction to Medical Assisting</u>	<u>49.8</u>
<u>MA 424NC</u>	<u>Basics of Medical Insurance,</u>

**New
 Clinical Medical Assistant
 Certificate of Completion**

The Clinical Medical Assistant Certificate of Completion is a noncredit certificate program that mirrors the credit clinical medical assistant courses and provides instruction and skills training for the incumbent worker seeking to upskill and cross train or the student seeking employment. Students learn law, ethics, infection prevention, safety, HIPAA, physical exam, interpersonal communication, medical records, documentation, laboratory procedures, venipuncture, pharmacology, medication administration, injections, minor office surgery, ECG, and spirometry procedures. Completers are eligible for employment as a clinical medical assistant in variety of healthcare settings. Program completion does not qualify students to sit for the California Certifying Board for Medical Assistants (CCBMA) certification.

Program Student Learning Outcomes

Students who complete this program will be able to:

- **Acquire knowledge related to safe, legal, and ethical patient care**
- **Demonstrate skills related to clinical medical assisting**
- **Assist the physician to perform patient care examinations and procedures**

REVISED PROGRAMS
ACADEMIC YEAR 2025-2026

Current
Agriculture Plant Science
Associate in Science for Transfer

As a part of the Sustainable Horticulture Program, the Associate in Science in Agriculture Plant Science is an interdisciplinary degree in Plant and Soil Science, (Sustainable/Ornamental) Horticulture, (Urban) Agriculture, Chemistry, Economics, Statistics, or related majors in the CSU system. Through the courses offered, students will learn a broad spectrum of subjects, including plant propagation, breeding, biotechnology, scientific research and laboratory skills, and, sustainable/ornamental horticulture. This program is formative for students interested in pursuing (sustainable/ornamental) horticulture or (urban) farming professions. Earning the Associate in Science for Transfer degree may support attempts to gain entry-level employment in fields such as urban farms, wholesale or retail nurseries, agronomic or entomologic labs, or, golf courses.

The goal of this degree is to provide students with foundational knowledge of the agriculture plant science field and a strong academic preparation for transferring to a CSU campus. Successful completion of the transfer degree in Agriculture Plant Science guarantees the student acceptance to a California State University (but does not guarantee acceptance to a particular campus or major) to pursue a baccalaureate degree in Plant Science, Agriculture, Agricultural and Environmental Plant Sciences, Agricultural Science, Agriculture Education, Agriculture Studies, (Sustainable/Ornamental) Horticulture, (Urban) Agriculture, or related majors. Upon completion of a baccalaureate degree, students are well prepared for a career as a plant scientist or researcher, (urban) farm manager, agriculture educator, bio-tech engineer, agronomist, arborist, crop scientist, entomologist, nursery manager, landscape manager or turf management specialist, and, more.

Program Student Learning Outcomes

Students who complete this program will be able to:

- Communicate and present well with learned contents, when interacting with colleagues and clients, by demonstrating, assessing and performing for (urban) agriculture and (sustainable/ornamental) horticulture.
- Demonstrate the ability to identify, evaluate, and recommend plants, including fruits and vegetables, which are sustainable to the local environment.
- Identify and implement fundamental principles of (urban) farming and (sustainable/ornamental) horticulture with practical applications.

Associate Degree for Transfer requirements (~~pursuant to SB1440, \$66746~~)

1. Completion of 60 semester units or 90 quarter units that are eligible for transfer to the California State University, including both of the following:
 - a. ~~The Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements (CSU GE-Breadth);~~
 - b. A minimum of 18 semester units or 27 quarter units in a major or area of emphasis, as determined by the community college district.
2. Obtainment of a minimum grade point average of 2.0. Students must earn a "C" (or "P" Pass) or better in all courses required for the major or area of emphasis.

 Anthropology
 Associate of Arts**

Anthropology is a diverse discipline that investigates the biological and cultural life of human beings across time and place. An anthropology degree provides students with an appreciation of other ways of life and a better understanding of the world in which they live. The curriculum in the Anthropology program is designed to provide the transfer student the opportunity to achieve an Associate of Arts (AA) in Anthropology degree by providing the necessary breadth in the field and an introduction to the methods used. While a baccalaureate or higher degree, which can be achieved through transfer, is recommended for those considering professional careers in anthropology, an associate degree may support attempts to gain entry-level employment as lab technicians, research assistants, museum workers, cultural resource conservators, and other related positions.

Program Student Learning Outcomes

Students who complete this program will be able to:

- Describe the breadth of anthropology and be able to characterize anthropology's distinctive theoretical and methodological approaches with respect to other disciplines.
- Explain the fundamental processes of human biological evolution.
- Describe modern human biological diversity.
- Articulate an understanding of the cultural construction and historical uses of the concept of race.
- Define and critically analyze the concepts of culture and cultural relativism.
- Demonstrate the ability to think holistically and comparatively in describing human cultural diversity.
- Critically analyze the process of globalization and its effects upon cultures around the world.
- Articulate an anthropological perspective on contemporary issues and concerns, including the politics of inclusion and exclusion both locally and globally.
- Discuss the importance of the scientific method in anthropological research.
- Identify the correct methods and ethical responsibilities involved in conducting archaeological, biological, ethnographic, and/or linguistic fieldwork.

Business Administration 2.0
Associate in Science for Transfer

~~The study of business is a broad and diverse discipline that encompasses topics and tools needed for transfer to baccalaureate programs as well as for entering the world of professional business careers, whether domestic or global. Students who complete the Business Administration 2.0 receive priority admission to the California State University system, though admission to a specific campus is not guaranteed. While an associate degree may support attempts to gain entry level employment or promotion, a baccalaureate or higher degree is recommended for those considering professional careers, pursuit of which can be achieved through transfer.~~

~~One of the main goals of the Business Administration 2.0 is to help students wishing to pursue a baccalaureate degree to transfer seamlessly to a CSU to major in Business Administration. Coursework necessary to transfer to a UC and many private universities is also included in the curriculum, and the courses selected by the student can be tailored with advice provided by an academic counselor to emphasize one of the various concentrations available.~~

Program Student Learning Outcomes

Students who complete this program will be able to:

- Demonstrate preparation preparation for transfer to a four-year institution with the required business, accounting, economics, math, and other learning.
- Identify, summarize, and compare the fundamentals of legal systems, and social, ethical, and political forces affecting the development and operation of businesses.
- Communicate clearly, effectively, and appropriately in writing and orally using the language of business.
- Make effective business decisions using appropriate systematic, evaluative, ethical, analytical, information-based approaches.
- Develop and exhibit high standards of professional practice, demonstrating awareness of ethical and social responsibilities in today's diverse, team-oriented, technology dependent, rapidly changing environment.

Associate Degree for Transfer requirements (pursuant to SB1440, SB6746)

1. Completion of 60 semester units or 90 quarter units that are eligible for transfer to the California State University, including both of the following:

Revised
Business Administration 2.0
Associate in Science for Transfer

The Associate in Science in Business Administration for Transfer Degree 2.0 (AS-T) prepares students to transfer seamlessly to a CSU with junior status to major in Business Administration, although not necessarily to a specific campus. Students who complete an AS-T are given priority consideration when applying to a particular program that is similar to the student's community college major and will be given a special GPA advantage when applying to CSU impacted campuses or majors. Students who are planning to pursue an AS-T are strongly advised to meet with a counselor for additional information about this transfer program.

Upon completion of the AS-T degree in Business Administration 2.0, students will have a general understanding of accounting, economics, computer information systems, business law, and will have taken a course in either business communications or business. They will also have sufficient understanding of mathematical concepts to enable them to successfully pursue a business degree at a four-year institution.

The AS-T degree in Business Administration 2.0 is appropriate for students whose vocational plans include careers in business fields such as accounting, computer information systems, finance, management, human resources, marketing, operations and supply chain management, or other business fields.

Program Student Learning Outcomes

Students who complete this program will be able to:

- Demonstrate preparation preparation for transfer to a four-year institution with the required business, accounting, economics, math, and other learning.
- Identify, summarize, and compare the fundamentals of legal systems, and social, ethical, and political forces affecting the development and operation of businesses.

Child and Adolescent Development
Associate in Arts for Transfer

The Associate in Arts in Child and Adolescent Development for Transfer (AAT) prepares students to demonstrate a basic understanding of child development theory and concepts, as well as preparation in lower-division coursework designed to enhance further developmental study. Studies include classical and contemporary research spanning conception through adolescence to promote the positive developmental outcomes essential to fostering healthy growth and learning of children and families in a diverse society. The major incorporates information from a variety of disciplines to provide a broad academic and professional foundation for working with children and families.

The major will provide students with the strong preparation necessary for pursuing studies at the university level in various careers such as children's services, mental health, family support, youth programs, developmental research, teaching, early childhood education, public policy, social work, school psychology, child life and similar fields related to children and their families from infancy through adolescence. The coursework is designed to meet the needs of people planning to transfer to CSU into programs in Child Development, Human Development, Child and Adolescent Development, Family and Consumer Sciences, and Liberal Studies (Child Development and Elementary Education Tracks). Students who complete the Associate in Arts in Child and Adolescent Development for Transfer degree receive priority admission to the California State University system, though admission to a specific campus is not guaranteed. While an associate degree may support attempts to gain entry-level employment or promotion, a baccalaureate or higher degree is recommended for those considering professional careers, which can be achieved through transfer.

Program Student Learning Outcomes

Students who complete this program will be able to:

- Synthesize research-based theories including principles and practices of child and adolescent development and learning.
- Utilize critical thinking skills to analyze, evaluate, and make decisions concerning complex contemporary issues and the interactions among individuals and across societies.
- Use scientific methodologies to study human development from infancy through adolescence.
- Demonstrate knowledge of development in all learning domains from conception through adolescence, including knowledge about typical and atypical development.

Associate Degree for Transfer requirements (pursuant to SB1440, §66746)

1. Completion of 60 semester units or 90 quarter units that are eligible for transfer to the California State University, including both of the following:
 - a. ~~The Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements (CSU GE-Breadth).~~
 - b. A minimum of 18 semester units or 27 quarter units in a major or area of emphasis, as determined by the community college district.

Associate in Arts for Transfer

The curriculum in the Geography program is designed to provide the transfer student the opportunity to achieve an Associate in Arts in Geography for Transfer by providing the necessary breadth in the field, an introduction to the methods used, and the ability to complete both major preparatory coursework along with courses required for general education. Students who complete the Associate in Arts Degree in Geography for Transfer receive priority admission to the California State University system, though admission to a specific campus or major is not guaranteed. While an associate degree may support attempts to gain entry-level employment or promotion, a baccalaureate or higher degree is recommended for those considering professional careers, which can be achieved through transfer.

Program Student Learning Outcomes

Students who complete this program will be able to:

- Demonstrate spatial literacy.
- Identify and describe a location (place) based on characteristics that distinguish them from other places on earth.
- Identify and describe movement of geographic phenomena.

Hospitality Management
Associate in Science for Transfer

The Associate in Science in Hospitality Management for Transfer prepares individuals for transfer to CSU Hospitality Management Bachelor of Science programs. This program is dedicated to preparing students with the skills necessary to successfully transfer. The program offers comprehensive coursework that encompasses the diverse hospitality industry. Students will obtain skills in the operational and legal aspects of hospitality management and supervision, food and beverage operations, cost control, event and catering management, human resources, marketing, and support operations. Emphasis is on guest service strategies, ethical considerations, effective communication, critical thinking, leadership standards, and teamwork. The program combines classroom and laboratory instruction providing students with well-rounded preparation in the hospitality industry. Students completing the program will be prepared for a career in the hospitality industry as entry-level hotel, motel and restaurant managers, food and beverage managers, event, banquet and catering professionals, resort managers and human resource administrators.

Students who complete the Associate in Science in Hospitality Management for Transfer degree will receive priority admission to the California State University system, though admission to a specific campus is not guaranteed. While an associate degree may support attempts to gain entry-level employment or promotion, a baccalaureate or higher degree is recommended for those considering professional careers, which can be achieved through transfer.

Program Student Learning Outcomes

Students who complete this program will be able to:

- Demonstrate preparation for transfer to a four-year Hospitality Management program.
- Demonstrate preparation for entry level employment in the hospitality industry.
- Identify legal and ethical considerations affecting the hospitality industry.
- Demonstrate knowledge of and experience of operations relative to the provisions of goods and services in the hospitality business.
- Observe foundations of leadership, management and human resources.
- Apply knowledge of financial management related to operations in hospitality.
- Demonstrate effective written and interpersonal communication skills.
- Identify event and catering management requirements.

Associate in Science for Transfer

The curriculum in the Mathematics program is designed to provide the transfer student the opportunity to achieve an Associate in Science in Mathematics for Transfer degree by providing the necessary breadth in the field, an introduction to the methods used, and the ability to complete both major preparatory coursework along with courses required for general education. Students who complete the Associate in Science Degree in Mathematics for Transfer receive priority admission to the California State University system, though admission to a specific campus is not guaranteed. While an associate degree may support attempts to gain entry-level employment or promotion, a baccalaureate or higher degree is recommended for those considering professional careers, which can be achieved through transfer.

Program Student Learning Outcomes

Students who complete this program will be able to:

- Demonstrate computational skills at a variety of levels.
- Apply critical thinking skills.
- Demonstrate proficiency in graphing.

Associate Degree for Transfer requirements (pursuant to SB1440, SB6746)

1. Completion of 60 semester units or 90 quarter units that are eligible for transfer to the California State University, including both of the following:
 - a. ~~The Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education – Breadth Requirements (CSU GE Breadth).~~
 - b. A minimum of 18 semester units or 27 quarter units in a major or area of emphasis, as determined by the community college district.
2. Obtainment of a minimum grade point average of 2.0. Students must earn a “C” (or “P” Pass) or better in all courses required for the major or area of emphasis.

Associate in Science for Transfer

The Nutrition program prepares students for a wide variety of employment opportunities involving the applications of fundamentals of normal nutrition. Employment possibilities include public agencies, day-care centers for the young and the elderly, food co-ops, recreation work, pregnancy clinics, education (such as preschool and elementary school), health clubs, gym and figure salons, health food stores and nutritional supplement sales, and drug abuse clinics. The program offers coursework for professional improvement, and some courses can be utilized as transfer courses for students pursuing a Bachelor's degree.

Students who complete the Associate in Science in Nutrition and Dietetics for Transfer degree will receive priority admission to the California State University system, though admission to a specific campus is not guaranteed. While an associate degree may support attempts to gain entry-level employment or promotion, a baccalaureate or higher degree is recommended for those considering professional careers, which can be achieved through transfer.

Program Student Learning Outcomes

Students who complete this program will be able to:

- Transfer to a CSU if pursuing a baccalaureate degree in Nutritional Sciences or similar major.
- Demonstrate a strong foundation in nutrition, culinary, psychology, and biological sciences necessary to pursue a 4-year degree and develop a successful career in Nutrition and Dietetics.

**Current
Public Health
Associate in Science for Transfer**

The Associate in Science in Public Health for Transfer Degree (AS-T) is designed to prepare students with a general education in the principles, concepts and methodologies of Public Health. Public Health is a dynamic field that focuses on community-based efforts to prevent disease, prolong life, and promote healthy environments and lifestyles. Students discuss the role of community engagement in promoting public health and social justice. They will learn of the multiple determinants of health, including sociological, economic, genetic, behavioral, environmental, and other factors that impact human health and health disparities. Students will gain understanding of the biopsychosocial basis for health and healthy populations. Students study the risk factors and modes of transmission for infectious and chronic diseases and how these diseases affect both personal and public health. They will apply the basic concepts, methods, and tools of public health data collection, use, and analysis and explain why evidence-based approaches an essential part of public health practice.

Students will be prepared for careers in a variety of settings, including hospitals, state and local health departments, non-profit agencies, educational institutions, research organizations, health clinics, and international programs.

This degree is designed for seamless transfer to a California State University. Students graduating with an Associate in Science in Public Health for Transfer Degree are well positioned to complete a bachelor's degree in a similar major within the California State University system with 60 units of upper-division coursework. Students who complete the Public Health AS-T degree are guaranteed admission to the CSU system, but not to a particular campus or major. Students must maintain a minimum grade point average (GPA) of at least 2.0 in all CSU-transferable coursework. While a minimum 2.0 is required for CSU admission, some majors may require a higher GPA. Please consult a counselor for more information.

Program Student Learning Outcomes

Students who complete this program will be able to:

- Appraise the guiding principles of public health as a discipline, including how public health differs from personal health.
- Propose public health interventions to improve the health of a population.
- Assess the burden of disease on the health of populations, including the impact of environmental exposures and use data to support evidence-based practices.
- Identify the various determinants of health and how it is impacted by policies.

Associate Degree for Transfer requirements (pursuant to SB1440, §66746)

 Associate of Arts**

The A.A. in Studio Arts prepares individuals to generally function as creative artists in visual media. Includes instruction in the traditional fine arts media (drawing, painting, sculpture, printmaking) and/or modern media (ceramics, textiles, intermedia, photography, digital images), theory of art, color theory, composition and perspective, anatomy, the techniques and procedures for maintaining equipment and managing a studio, and art portfolio marketing. The Studio Arts A.A. degree provides transfer preparation for students interested in pursuing further education in Studio Arts or Fine Arts. While a baccalaureate or higher degree is recommended, earning the associate degree would demonstrate achievement and will support entrepreneurial students in starting their own creative careers and art related work.

Program Student Learning Outcomes

Students who complete this program will be able to:

- Demonstrate critical thinking and problem solving skills needed to develop a personal aesthetic.
- Demonstrate practical skills that translate into a higher level of qualification for transfer or employment in the areas of illustration, painting, printmaking, ceramics, sculpture, jewelry, metalsmithing, photography, art education, museum studies, art sales, digital arts and many other art related careers.

**Current
 Sustainable Horticulture
 Certificate of Achievement**

Sustainability is a key component of the Horticulture Program. Sustainable horticulture is among several fields of study that are uniquely poised to capture opportunities presented by the expanding Green Industry and an increasing awareness of the need to preserve and protect limited resources. The Sustainable Horticulture Certificate of Achievement program is based on horticultural science and technology, and prepares students for careers such as community, residential, and urban farm planning and design, organic grower, arborist, nursery management, nursery sales, nursery support, pest control adviser, and creation of gardens for human well-being and therapy. Careers also include opportunities related to the production and care of ornamental herbaceous plants, trees, shrubs, fruits, nuts, and vegetables commonly used in landscape design, urban farming, therapeutic gardens, and plant nurseries. Students, ~~who~~ may pursue being a certified arborist by the State of California, ~~may also elect to take HORT 144 to prepare for the C27 Landscape Contractor Licensing Exam.~~

Program Student Learning Outcomes

Students who complete this program will be able to:

- Grow and maintain ornamental plant materials, based on principles of sustainable propagation.
- Identify ~~local~~ plant materials, especially, those well adapted to local conditions including herbaceous ground covers, trees, shrubs, and California natives.
- Identify plants contributing to local ecologies and habitats.
